Sachdarstellung:

Die Stadt Bergkamen hat seit einigen Jahren die Möglichkeit, Verkehrsmengen und gefahrene Geschwindigkeiten messtechnisch mit eigenem Messgerät zu erfassen. Das Messgerät kommt insbesondere im Vorfeld von Planungen zum Umbau bestehender städtischer Straßen zum Einsatz, um Grundlagendaten für derartige Planungen zu ermitteln.

Darüber hinaus kommt es zum Einsatz, um subjektive Eindrücke in Bezug auf die gefahrenen Geschwindigkeiten und das tatsächliche Verkehrsaufkommen zu verifizieren und auf eine objektive Grundlage zu stellen. Dies hat sich bei vielen Bürgeranfragen als sehr hilfreich erwiesen.

Seit Mitte 2005 ist die mittlerweile verbesserte Generation der Messgeräte im Einsatz, deren Fehlerquote deutlich unter der ersten Generation liegt.

Die letzten Messungen fanden in der Friedhofstraße und der Südlichen Salzstraße statt.

1. Friedhofstraße:

Anwohner der Friedhofstraße führten Klage über die Anzahl der Lkw-Fahrten in der Friedhofstraße zu den dort ansässigen Gewerbebetrieben und die gefahrenen Geschwindigkeiten dieser Fahrzeuge. Darüber hinaus würden viele Lkw-Fahrten in der Nachtzeit stattfinden.

Im Rahmen der Verkehrssignalschau wurden diese Punkte ebenfalls erörtert und die Empfehlung gegeben, eine Verkehrsmessung durchzuführen.

Die Messung wurde in der Zeit vom 30.08.2005 bis 02.09.2005 durchgeführt. In dem gesamten Zeitraum wurden in Fahrtrichtung Westen 1.372 Pkw, 71 Lkw und 27 Lastzüge gezählt. In der Fahrtrichtung Osten waren es 1.282 Pkw, 75 Lkw und 36 Lastzüge. Nächtliche Lkw-Fahrten konnten nicht festgestellt werden. Die mittlere Geschwindigkeit, die von 85 % der Verkehrsteilnehmer gefahren wurde (V 85-Wert), liegt bei 53 km/h. Handlungsbedarf zur Änderung der bestehenden verkehrsrechtlichen Regelung besteht daher nicht.

2. Südliche Salzstraße:

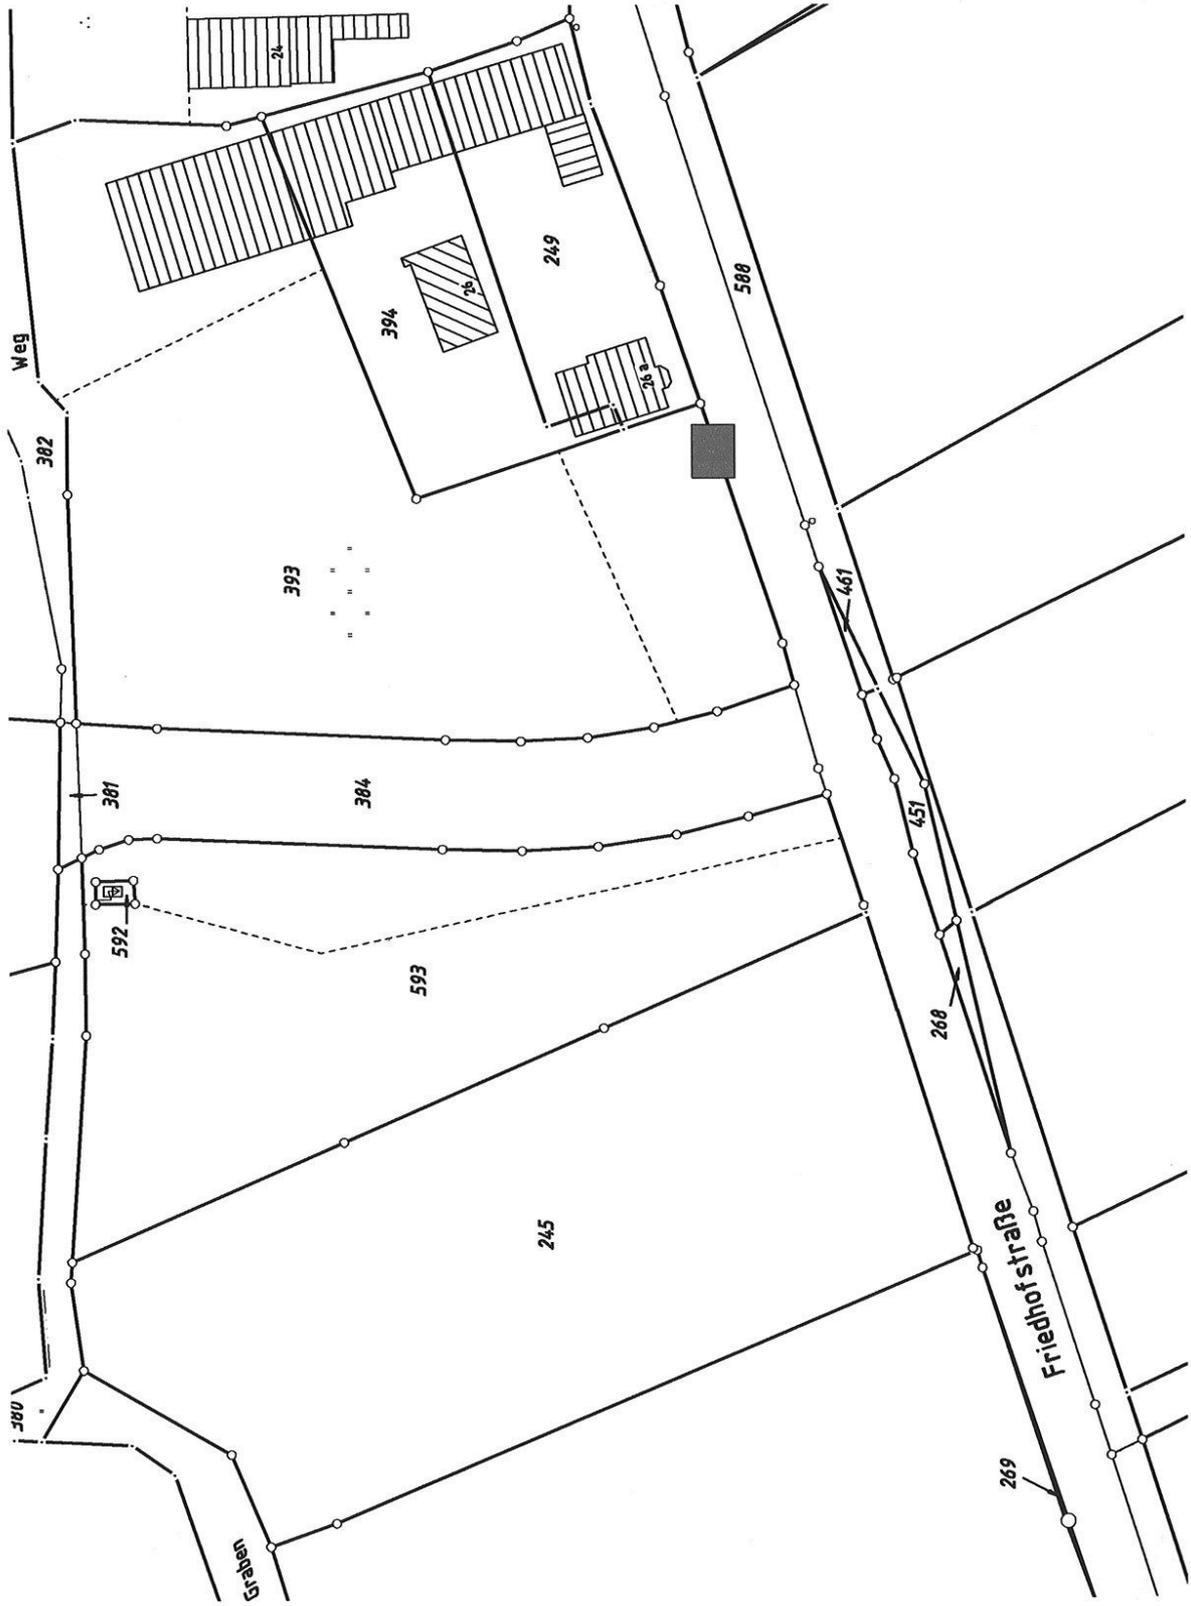

Nach Umbau der Südlichen Salzstraße wurde von Anliegern beklagt, dass nach dem Umbau die Südliche Salzstraße mit überhöhter Geschwindigkeit befahren wird.

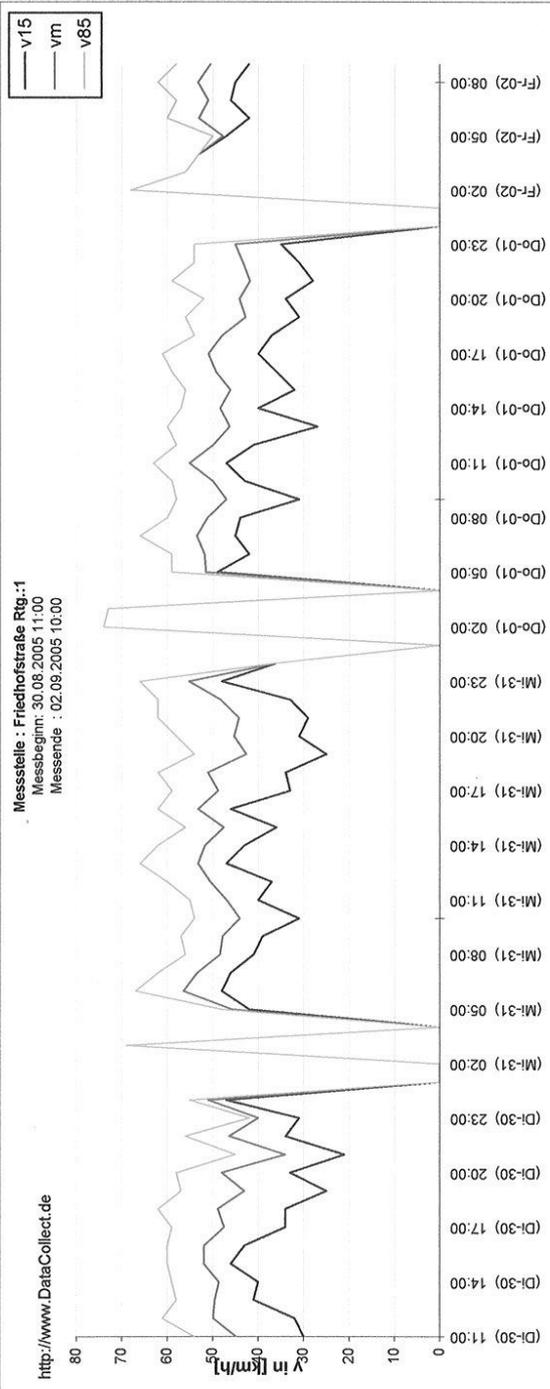

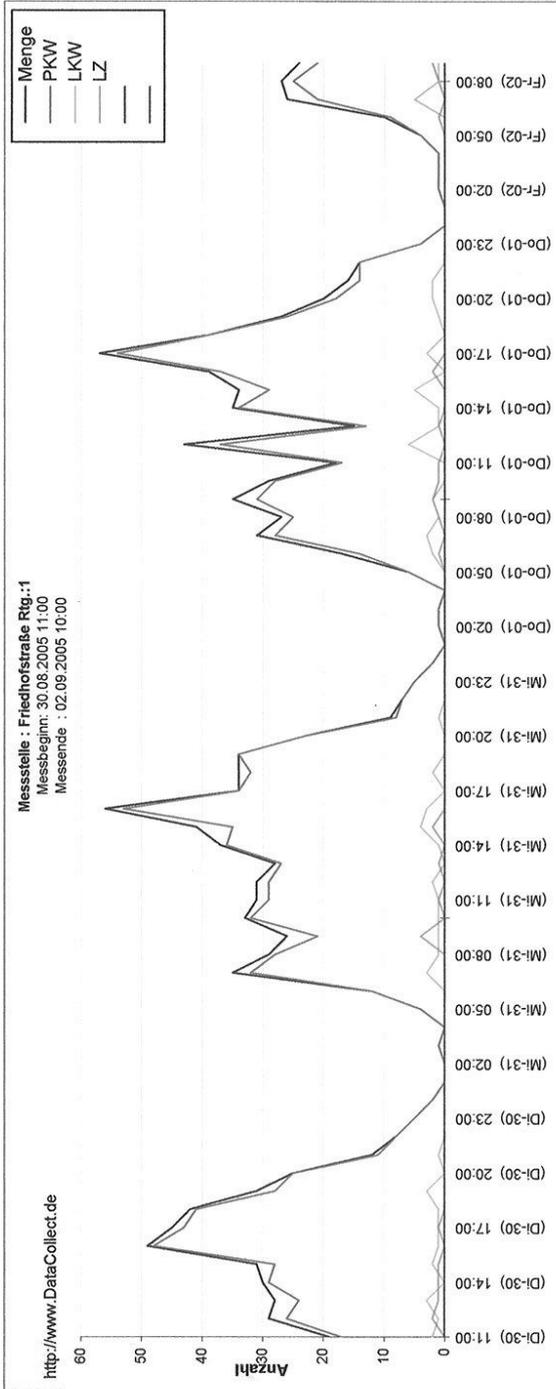

Die Messung in der Südlichen Salzstraße wurde in der Zeit vom 02.11.2005 bis zum 07.11.2005 durchgeführt. In diesem Zeitraum wurden 910 Pkw, 92 Lkw und 2 Lastzüge in nördlicher Fahrtrichtung gezählt. In südlicher Fahrtrichtung waren es 896 Pkw und 117 Lkw. Die mittlere Geschwindigkeit, die von 85 % der Verkehrsteilnehmer gefahren wird (V 85-Wert), liegt bei ca. 35 km/h und entspricht nahezu den vorgeschriebenen 30 km/h. Die Verkehrsfrequenz entspricht der Einwohnerdichte der Südlichen Salzstraße und ihrer Einstufung als Anliegerstraße.

Beschlussvorschlag:

Der Ausschuss für Bauen und Verkehr nimmt die Vorlage der Verwaltung zur Kenntnis.
